Gary:

We are nearing the end of the hazardous material sludge box removal. The current box VB 633 is full of debris especially six inch ADS hose that is full of product. We are working through the clean-up of this box, but it is difficult. Daniel is sending pictures to clarify what we are dealing with in VB. We are doing longer entry due to the improving weather conditions. We would like to place the debris in the current OD roll off box instead of in the working bay. This will clean up the area and reduce the odor.

Leroy:

The work accomplished on this site does not appear to correlate with the costs incurred. I am concerned about our efficiency in effectiveness in accomplishing the tasks.

Thanks
